Vsebina:

Kakšno vlogo imajo pametna mesta v kontekstu trajnostnega razvoja, krožnega gospodarstva in glokalizacije? Odgovore na to vprašanje boste odkrivali v enem od temeljnih predmetov prvega letnika. Ugotovili boste, da so lahko pametna mesta presečišče ekonomskega, okoljskega in družbenega trajnostnega razvoja. Kritično boste razmišljali, kako sploh opredeljujemo trajnostni razvoj ter kakšno vlogo imajo podjetja, nevladne organizacije in drugi deležniki pri trajnostnem razvoju. Spoznali boste tehnologije in primere matematičnih modelov, ki prispevajo k vzpostavitvi glokalnega ravnovesja.

- Okoljska ekonomika in politika
- Opredelitev trajnostnega razvoja
- Zelena ekonomija
- Ekonomski instrumenti za spodbujanje varovanja naravnega okolja
- Pomembnost fizike v luči merjenja in razumevanja okoljskih problemov ter razvoja trajnostnih tehnologij
- Evolucijska teorija iger kot orodje za preučevanje izzivov na področju podnebnih sprememb
- Vpliv opravljanja dejavnosti na zdravje ljudi in naravno okolje
- Družbena odgovornost in trajnostni razvoj
- Politični in gospodarski okviri trajnostnega razvoja danes in v prihodnosti
- Globalno in lokalno ravnotežje na mikro in makro nivoju (rast vs pravičnost, razpršenost vs koncentracija)
- Lokalni in globalni vidik urbanega razvoja
- Pametna mesta kot presečišče ekonomskega, okoljskega in družbenega trajnostnega razvoja
- Pojem glokalizacije (razvoj in prikaz na regularnih ter kompleksnih mrežah)
- Lokalizacija tehnologij in dobrih praks (trgovanje z emisijskimi kuponi)
- Vloga podjetij in drugih deležnikov pri trajnostnem razvoju (prenos znanja in najboljših razpoložljivih tehnik)
- Krožno gospodarstvo

Content (Syllabus outline):

What is the role of smart cities in the context of sustainable development, the circular economy, and glolocalisation? The answers to this question will be revealed in one of the main courses of the first year. You will see that smart cities can be the intersection of economic, environmental, and social sustainable development. You will develop critical thinking on how sustainable development is even defined and on the role of companies, non-governmental organisations, and other stakeholders in sustainable development. You will learn about technologies and examples of mathematical models that contribute to finding the glocal balance.

- Environmental economics and policy
- The concept of sustainable development
- Green economy
- Economic instruments for facilitating environmental protection
- The importance of physics in light of measuring and understanding environmental problems and the development of sustainable technologies
- Evolutionary game theory as a tool for studying challenges in climate change
- The impacts of business activities on human health and the natural environment
- Social responsibility and sustainable development
- Political and economic frameworks of sustainable development today and in the future
- Global and local balance at micro and macro level (growth vs. fairness, dispersion vs. concentration)
- The local and global aspect of urban development
- Smart cities as the intersection of economic, environmental and social sustainable development
- The concept of glolocalisation (development and demonstration in regular and complex networks)
- Localisation of technologies and best practices (emission allowance trading)
- The role of companies and other stakeholders in sustainable development (transfer of knowledge and best available techniques)
- Circular economy
- The role of non-governmental organisations

- Vloga nevladnih organizacij
- Strategije igralcev s primeri matematičnih modelov za vzpostavitev globalnega ravnoesja ter izzivi za prihodnost

- Strategies of players utilising mathematical models for establishing glocal balance and future challenges

Predvideni študijski rezultati:**Študenti bodo:**

- najti informacije o okoljskem stanju mest
- analizirati kakovost in usklajenost pametnih iniciativ s cilji in potrebami mest
- razumeti ključne faktorje uspeha pametnih iniciativ
- prepozнатi specifičnosti lokalnega okolja v primerjavi z evropskimi mesti
- replicirati in prilagoditi uspesne pametne iniciative lokalnemu okolju

Intended learning outcomes:**On completion of the course student will be able to:**

- find information about the environmental condition of cities
- analyze the quality of smart initiatives and coherence with the goals and needs of cities
- understand the key factors of success of smart initiatives
- identify the specifics of the local environment compared to European cities
- replicate and adapt successful smart initiatives to the local environment

Metode poučevanja in učenja:

Frontalno delo: predavanja z aktivno udeležbo študentov (razlaga, diskusija, reševanje primerov)

Sodelovalno skupinsko delo: seminarske vaje (projektno delo, timsko delo)

Individualno delo: individualne aktivnosti (naloge, študij literature in virov, razvojno in raziskovalno delo, refleksija, samoocenjevanje, javni nastop, pisni izdelki)

Študij v virtualnem okolju: sodelovalne in individualne aktivnosti (naloge, forum, klepetalnica, študij gradiva)

Sodelovanje gostujočega predavatelja

Drugo: Študij primerov
Opredeljene metode poučevanja in učenja so pri študiju na daljavo ustrezno podprtne s sodobnimi informacijsko-komunikacijskimi orodji in dopolnjene z učinkovitim pristopi poučevanja in učenja v virtualnem učnem okolju.

Learning and teaching methods:

Frontal instruction: lectures with active participation of students (explanations, discussions, case study)

Collaborative group work: tutorial work (project work, team work)

Individual work: individual activities (coursework, study of literature and resources, development and research work, reflections, self-evaluation, public speaking, written assignments)

Study in the virtual environment: collaborative and individual activities (tasks, forums, chat room, literature study);

Visiting lecturer

Other: The teaching and learning methods that are employed in distance learning are supported by modern information and communication tools and supplemented with effective teaching and learning approaches within the virtual learning environment.

- understand the concept of strategic human resource management and the nature of strategic processes and will be able to respond to challenges and some critical questions and discussions in this field;
- be able to prepare a concrete proposal of HRM activities and measures on the basis of a case study,
- understand and know how to prepare a proposal for retaining and motivating employees,
- be able to prepare a draft proposal of a performance management system.

Metode poučevanja in učenja:

Frontalno delo: predavanja z aktivno udeležbo študentov (razlaga, diskusija, reševanje primerov)

Sodelovalno skupinsko delo: seminarske vaje (projektno delo, timsko delo)

Individualno delo: individualne aktivnosti (naloge, študij literature in virov, razvojno in raziskovalno delo, refleksija, samoocenjevanje, javni nastop, pisni izdelki)

Študij v virtualnem okolju: sodelovalne in individualne aktivnosti (naloge, forum, klepetalnica, študij gradiva)

Drugo: študijski obiski, ekskurzije

Opredeljene metode poučevanja in učenja so pri študiju na daljavo ustrezno podprtne s sodobnimi

Learning and teaching methods:

Frontal work: lectures with active participation of students (explanation, discussion, solving cases)

Collaborative group work: tutorials (project work, team work)

Individual work: individual activities (assignments, study of literature and sources, development and research work, reflection, self-assessment, public speaking, written products)

Study in a virtual environment: collaborative and individual activities (assignments, forum, chat room, study materials)

Other: study visits, excursions

informacijsko-komunikacijskimi orodji in dopolnjene z učinkovitimi pristopi poučevanja in učenja v virtualnem učnem okolju.	The defined teaching and learning methods in distance learning are adequately supported by modern information and communication tools and complemented by effective approaches to teaching and learning in a virtual learning environment.

Predvideni študijski rezultati:

Študent/ka bo:

- Uporabil/a refleksijo o lastnem zavedanju sebe in coaching kompetenc ter njihov razvoj
- Znal/a prepoznati, opredeliti, obravnavati in ovrednotiti zahteve glede poklicnih kompetenc za individualno akreditacijo pri strokovnih organizacijah
- Znal/a razlikovati med kompetencami, ki so potrebne za učinkovito izvajanje coachinga, npr. aktivno poslušanje, empatija, EQ, samozavedanje, vzpostavljanje odnosov
- opredeliti, prepozнатi cilje in globino dogovora med coachem in klientom ter pri tem upoštevati vprašanja na mikro- in makroravnini
- razumel/a, kako pristopiti k razvoju učinkovitega dogovora o coachingu in odnosa (tj. zaupanja, odnosa) s klientom
- razvil/a sposobnosti napisati lastno pogodbo o dogovoru med coachem in klientom
- razvil/a zavedanje o etičnih smernicah in standardih coachinga ter jih razlikovati od drugih poklicev (npr. psihoterapevtov, mentorjev)
- zнал/a ustrezno uporabiti poklicne smernice pri etičnih dilemeh v različnih coaching situacijah

Intended learning outcomes:

A student will:

- Reflect on and develop own self awareness and coaching competencies
- Identify, define, discuss and evaluate professional competency requirements for individual accreditation with professional bodies
- Distinguish between specific skills required for effective coaching e.g., active listening, empathy, EQ, self awareness, relationship building
- Define, recognise the aims and depth of the coaching agreement, considering issues at the micro and macro level;
- Understand how to approach the development of an effective coaching agreement and relationship (i.e., trust, rapport) with a client;
- Think about and write own coaching agreement contract
- Develop awareness of coaching ethics and standards guidelines, distinguishing these from other professions (e.g., Counsellors);
- Apply appropriately, such professional guidelines to ethical dilemmas across coaching situations.

Metode poučevanja in učenja:

Frontalno delo: webinarji z aktivno udeležbo študentov (razlaga, diskusija, reševanje primerov) in predavanja v obliki posnetkov webinarjev

Sodelovalno skupinsko delo: reševanje timskeh nalog vaje (projektno delo, timsko delo)

Individualno delo: individualne aktivnosti (naloge, študij literature in virov, razvojno in raziskovalno delo, refleksija, samoocenjevanje, javni nastop, pisni izdelki)

Študij v virtualnem okolju: sodelovalne in individualne aktivnosti (forum, klepetalnica, študij gradiva)

Opredeljene metode poučevanja in učenja so pri študiju na daljavo ustrezno podprtne s sodobnimi informacijsko-komunikacijskimi orodji in dopolnjene z učinkovitim pristopi poučevanja in učenja v virtualnem učnem okolju.

Learning and teaching methods:

Frontal work: webinars with active participation of students (explanation, discussion, case solving) and lectures in the form of webinar recordings

Collaborative group work: solving team tasks (project work, team work)

Individual work: individual activities (assignments, study of literature and sources, development and research work, reflection, self-assessment, public speaking, written products)

Study in a virtual environment: collaborative and individual activities (forum, chat room, study material)

The defined teaching and learning methods in distance learning are adequately supported by modern information and communication tools and complemented by effective approaches to teaching and learning in a virtual learning environment.

Vsebina:

- Izbor teme raziskovanja;
- Formulacija problema, postavitev relevantnih raziskovalnih vprašanj in hipotez;
- Odločanje o raziskovalnem pristopu in izboru raziskovalne strategije;
- Priprava dispozicije magistrske naloge:
 - Opredelitev problema raziskave in teoretičnih izhodišč,
 - Opredelitev pristopa k zastavljeni problematiki raziskovanja,
 - Opredelitev metod in tehnik raziskovanja za doseganje ciljev naloge,
 - Opredelitev členjenosti vsebine,
 - Opredelitev literature in virov;
- Prijava teme in mentorja magistrske naloge;
- Vzorčenje in zbiranje podatkov;
- Študij literature in virov;
- Izdelava magistrske naloge;
- Priprava predstavitev magistrske naloge in zagovor.

Content (Syllabus outline):

- Choosing a research topic;
- Identification of the research problem, development of hypotheses and research questions;
- Deciding on a research approach and selecting a research strategy;
- Preparation of the disposition of the master's thesis:
 - Definition of the research problem and theoretical frameworks,
 - Defining the approach to the research problem,
 - Defining of the research methods to achieve the objectives of the master's thesis,
 - Defining of the content structure,
 - Identification of references (literature);
- Formal application of the master's thesis and mentor;
- Sampling and data collection;
- Writing down the master's thesis;

- Sposobnost prepoznavanja konkretnih problemov na področju programa;
- Reševanje konkretno problematike s pomočjo usvojenega teoretičnega znanja;
- Oblikovanje izvirnih idej, konceptov in rešitev določenih problemov;
- Samostojnost in usmerjenost v reševanje problemov;
- Razvoj kritične presoje;
- Uporaba znanstvenih metod pri raziskovanju;
- Obvladovanje sistematičnega iskanja informacij in virov;
- Analiza in sinteza informacij;
- Zmožnost partnerskega dela;
- Povezovanje različnih znanj ter pomena uporabe strokovne literature;
- Samostojno učenje;
- Uporabo informacijske tehnologije.

Students will acquire the following general and subject-specific competencies:

- Ability to identify specific problems in the field of study programme;
- Solving specific problems through the use of theoretical knowledge;
- Formulating original ideas, concepts and solutions to particular problems;
- Autonomy and problem-solving orientation;
- Developing critical judgment;
- Scientific methods usage in research;
- Systematic search for information and resources;
- Analysis and synthesis of information;
- Ability to work in partnership;
- Integrating different knowledge and the importance of using professional literature;
- Independent learning;
- Use of information technology.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študentje bodo:

- izvedli raziskavo na izbrano temo v obliki magistrske naloge;
- oblikovali relevantno raziskovalno vprašanje na temelju predstavljenega kompleksnega problema;

- izvedli celoten raziskovalni postopek na podlagi kvalitativnih in kvantitativnih metod raziskovanja;
- ustrezno vzorčili ter aplicirali izbrano metodo pridobivanja podatkov;
- povezali pridobljeno znanje z različnih vsebinskih področij programa;
- izpeljali jasno in zanimivo predstavitev ugotovitev raziskave.

Intended learning outcomes:

Knowledge and understanding:

Student will :

- conduct a research on a selected topic in the form of a master's thesis;
- formulate a relevant research question based on the presented complex problem;
- single out a solution to a theoretical problem and formulate proposals for solving complex empirical problems;
- select key concepts and theories in bibliographic databases and prepare a research framework;
- conduct the entire research process on the basis of qualitative and quantitative research methods;
- appropriately sample and apply the selected data acquisition method;
- integrate acquired knowledge from different content areas of the program;
- made a clear and interesting presentation of the research findings.

Metode poučevanja in učenja:**Learning and teaching methods:**

Individualno delo: individualne aktivnosti (študij literature in virov, razvojno in raziskovalno delo, refleksija)

Delov parih oz. skupini: delo z mentorjem in ostalimi posamezniki, vključenimi v raziskovalne aktivnosti

Individual work: students' individual activities (literature and resources studies, research and development work, reflection)

Pair/group work: consultations with a mentor and other individuals involved in research activities
